Cancel claim 11.

Rewrite claims 6 and 10 thus:

6. (Amended) A substantially pure canine Cathepsin S protease protein, ~~in substantially pure form~~ comprising the amino acid sequence set forth in SEQ ID NO:2.

10. (Amended) A method of identifying compounds that inhibit ~~modulate~~ canine Cathepsin S protease protein activity, comprising:

a) combining a compound suspected of being an inhibitor ~~a modulator~~ of canine Cathepsin S protease protein activity with the canine Cathepsin S protease protein having the an amino acid sequence set forth in ~~corresponding to~~ SEQ ID NO:2; and,

b) measuring an effect of the compound on the protease activity of the canine Cathepsin S protease protein,

whereby an inhibitory compound is identified by a reduction in the protease activity of the canine Cathepsin S protease.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Linda S. Evans on April 12, 2004.

The following is an examiner's statement of reasons for allowance:

The above examiner's amendment is made so that claims 6 and 10 may state a definite description of the subject matter Applicant had intended, where any Cathepsin S of any source is, perforce, a protease, and where there is no basis in the specification for assessing the extent or nature of "correspondence" of another amino acid sequence with the amino acid sequence set forth in SEQ ID NO:2.
